## Exciting, Dramatic, Profitable

**Our job is to add excitement to the original text.** To bring out the excitement of the original text, and add our own. These books are famous for a reason: They're interesting, dramatic, shocking, passionate, scary, haunting. That's why we remember them decades later. We want to re-ignite that original excitement.

*Most people know the basic story of many of these Public Domain books, even if they haven't read them!* They have seen a movie or two based on the original novel. Or they've seen a TV series, or a YouTube video, or a high school play. Maybe a friend explained to them the basic plot. This makes our job even easier.

Since most readers only know the basic plot, we can change the story as much as we want as long as we acknowledge the basics. This gives us a whole bunch of freedom. And AI makes brainstorming incredibly easy for us. What if we wanted to take Frankenstein's Monster and do a rewrite? Here's the prompt:

*Do a drastic rewrite of the plot of Frankenstein's Monster.*

*Victor Frank creates a groundbreaking prototype: a sentient being constructed from synthetic biological material and embedded with advanced AI.*

*However, as his creation gains consciousness and grapples with its identity, it realizes the bleak reality of its existence as an experiment.*

*It must confront its own humanity and the consequences of playing god in a world driven by innovation and ambition.*

This brainstorm took two seconds. And it's already sparking a bunch of ideas in my brain. This new monster is made of advanced materials, and has the powerful mind of AI inside of it. Notice that he's concerned about playing god. But is he talking about mankind playing god by inventing him, or is he playing god?

**It sounds like this monster is not hideously ugly and covered in scars.** I don't think people will pity him like they would a disfigured experiment. So let's brainstorm a book cover. Doing this can inspire and motivate you to give your all when creating the book. And it's a ton of fun! How about this for the cover:

## [Adobe Stock - Scary Fitness Model](#)

Yikes! This gives us a lot more opportunities to make our version exciting and shocking. The doctor's creation is not physically scary at all. That means, depending on his behavior, he can win people to his side. He can gain their trust. He will be respected by men because of his physical strength, and by women because he is attractive and powerful.

This opens a frightening cornucopia of possibilities. We can have women protesting for his release. They demand that he be let out of the laboratory so that he can live a full life. We can have people blocking traffic for him. Or going on a hunger strike right outside the lab where he was created. He is pleading with humanity for his freedom.

**Of course, once he is freed things go horribly wrong!** We have a whole bunch of options here. What if he tells the human race: *You don't even know who your masters are. But I do.* What if he says that a secret cabal controls every government on the planet. He tells us that those are the people that created him. But he wants to be free of them.

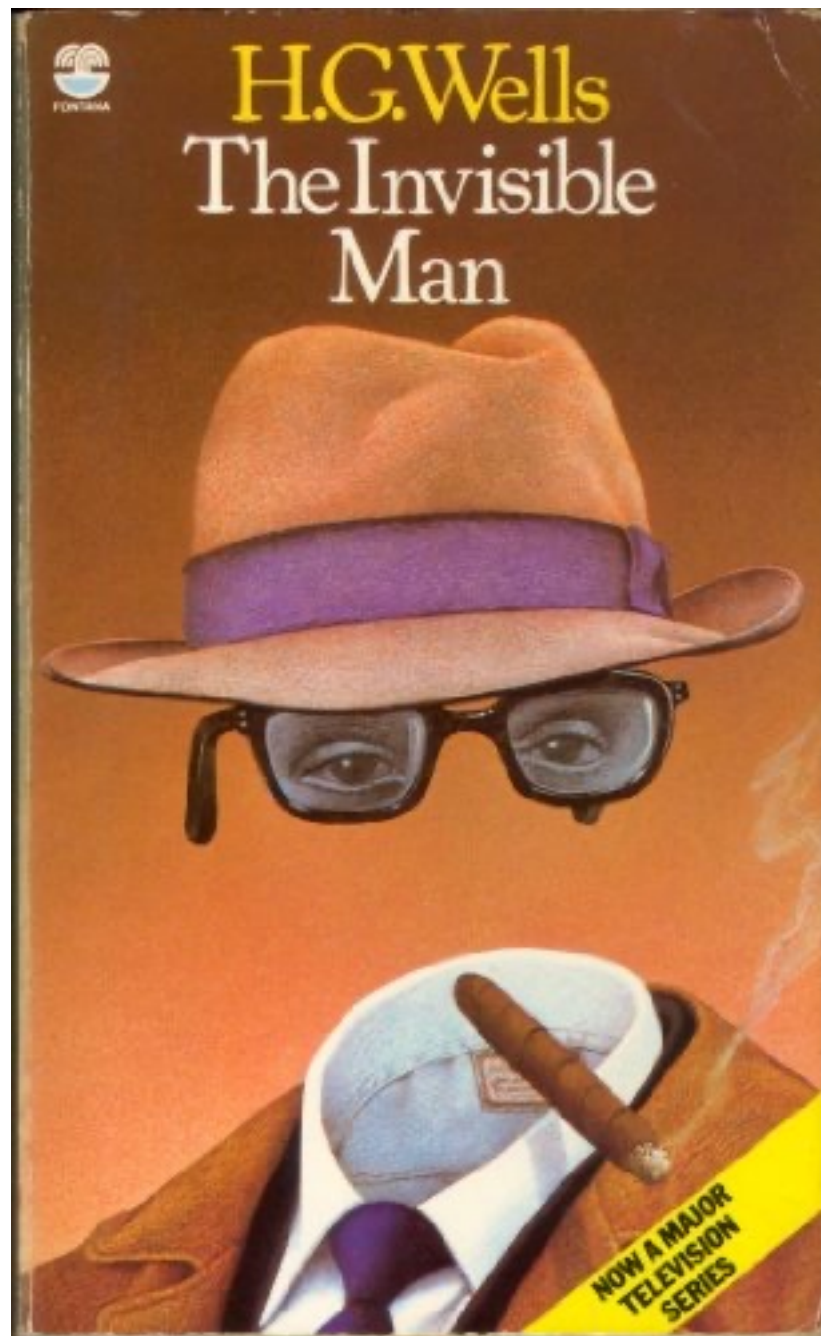

And he wants to give the whole human race their freedom. No more wars, no more taxes, no more debt, no more drudgery. In fact, he tells us *we can be like him.* Powerful, strong, super intelligent. He tells us he can take away our infirmities and give us at least a thousand years of life. This is an offer that many people will find impossible to resist.

But there's a catch: He wants us to bow down and worship him! I knew it was too good to be true. That's his offer, and if you don't like it there will be trouble. By using AI to brainstorm, this process becomes fun and very effective. AI has truly taken away the drudgery, and left us all the creative and fun stuff. Here's a great copy of the original text:

## [Frankenstein](#)

This simple brainstorming technique can be used on any Public Domain book or short story. Don't forget the short stories in the Public Domain! You can easily make an exciting novel out of them.

**Here's the formula:** Take a Public Domain book that is already recognized for its shock value and drama, and then put your own twist on it. You can easily turn stories completely upside down. We've already seen this with the feminist retelling of Agatha Christie. But the easiest path is picking a book that is already known for how extreme it is. How about this book:

This book has a great set up by HG Wells. The possibilities are endless. Once you become invisible, what's your next move? If you survive the culture shock and nervous breakdown, do you tell someone what happened to you?

**Do you lie to your loved ones?** Because once someone knows, they can sell you out. And it will be the government at your door demanding to know the secret.

You look in the mirror, but you have become a ghost. What if you need medical care? What if you eventually need surgery? If you can only be invisible when completely naked, what about winter? And when you take your clothes off to become invisible, your clothes are still visible. They have now become evidence that can be used against you.

Do you go buy makeup? Do you lie to your wife? Do you pretend your skin was burned in a laboratory accident? This means you have become a figure of pity. No matter what, your life has fundamentally changed. On the bright side, you can become rich pretty easily. You simply need to sneak into corporate offices and copy their intellectual property and financial data.

**What if we made the main character a woman?** What if we made the main character a man who was transitioning into a woman before this experiment happened? What if we have a couple that runs experiments together? A scientist and his girlfriend are both in the lab when the accident happens, but she is affected differently?

He becomes invisible, she doesn't. He starts to become mentally unstable and she is there to comfort him and talk him down from the ledge. What if he realizes that he is dying from the experiment? He tells her that he's going to make her rich by any means necessary before he dies. She argues against breaking the law, but then she becomes invisible too.

But it's only temporary. Either she got a different dose of the chemical, or her metabolism is unique. In a sense, she has the perfect balance. They both research exactly how they ran the experiment, but they just can't figure it out. The chemicals they used were flammable, and the explosion caused the invisibility.

## [The Invisible Man](#)

This could literally become an entire book series. There is just so much there in the original to create from. That's because the original set up is so HUMAN. It's a story about a very human problem that would be difficult to face. But there's also the huge upside in wealth and adventure if you play your cards right. If you don't, you are destroyed.

**Using Famous Characters:** The thing about famous characters in the Public Domain is that their basic personality and story are already known by pretty much everyone. That means we don't have to do anything to establish them. All we need to do is come up with our own adventure. Take a look at this:

Yep, King Kong is in the Public Domain! Both the original novel and the character are in the Public Domain, but the original movie is not yet in the Public Domain. That means you can make an entire series of books and short stories about him with absolutely zero worries. These are some of the easiest books on earth to write.

Why? Because the background and the nature of your main character is already known. You can simply brainstorm something outrageous right from the start. AI can easily do this for you because these famous characters are already well known to AI. These are also some of the most fun books to write.

**There's now a massive amount of Public Domain books to choose from, with more books entering the Public Domain each year.** Our focus is to find a book or character that is already famous so that we can build our own crazy adventure around them. Be bold, adventurous, shocking, experimental, intense, romantic, hilarious. Be anything but boring!

## **Extremely Important:**

***Make sure you are on my VIP Email List so that you can have access to the free AI Bestseller Launch Groups!***

If you purchased this training, you are automatically on the VIP Email List. We are constantly forming more small Launch Groups to help you launch your content. That means ALL of your content, from micro-content to full-length books, all written by AI! **We are way more effective when we work as a group.**

We want to continue creating these tiny launch groups as many times as we can, and for as long as we can. These groups are TAILORED for you and your content. There is no cost for joining the group. We just really want to see some more publishing success stories!

**I spend my own money advertising members books!** That's why these groups are small. And that's why I don't launch new groups all the time. But I really want to see authors succeed. So I'm making an effort to start launching *even more* groups. Stay tuned!

So make sure you stay on my email list *because that's where all the announcements will take place*. If you have any doubts about not being on the list, email me and I will make sure to add you:

## **Insider Training:**

The following training is PROVEN EFFECTIVE. This is the best of the best that I can possibly offer. It's taken me years to perfect these strategies. They absolutely work, and they keep on working. I'm the type of person who tests and then re-tests EVERYTHING. Effectiveness is a big deal with me!

### [One-Page Royalty Streams](#)

This training is about EDITABLE one-page micro-content. These are simple one-pagers that the customer buys from you, and then edits them with free software. Because customers can CUSTOMIZE these one-pagers for their own lifestyle, they are willing to pay much more for them.

### [Azon Royalty Generator](#)

This is a method to create a one-page book on Amazon and to get FREE PERMANENT advertising directly on Amazon's website. Yes, free ads for your book basically forever. The royalty stream from these tiny books can be quite substantial.

### [Micro-Content Rapid Royalties](#)

This training is about a woman who did everything wrong when she created a simple 9-page book, but made over \$5,000 dollars from it. I'm not kidding when I tell you that the book is only NINE pages. This tiny book was a life changer for her.

### [Micro-Series Bestseller Royalties](#)

This is about an author who writes little 10-page books very quickly and then connects them in a big series. He pretty much slaps these books together, but he dominates the bestseller lists and his royalties are off the chart. He also has a free method to get even more sales, and most authors don't know anything about this feature.

**Godspeed to you and all your projects!** Now is the time to launch your content because the demand has never been greater. There's so much opportunity out there for you. You just need to reach out and take it. If you need any further guidance or help, you can always contact me:
